

Note *The Min, Max and Valid Amount's used for the tests should be per the agreed upon contract. Please see table below for min/max per country*

Test ID	Test Description	Expected Result	Response	Request ID	Timestamp
1	Load an amount < Min Amount	Load should fail as the amount is < Min Amount			
2	Load an amount > Max Amount	Load should fail as the amount is > Max Amount			
3	Load Valid Amount	Load should succeed as it is between the expected range			
4	Load Valid Amount using an invalid token (not in the token list)	Load should fail as the token is not valid			
5	Void the transaction from Test ID 3	Void should succeed			
6	Void a valid transaction (valid request id) but using an invalid Token (not in the token list)	Void should fail as the token is not valid			
7	Validate a Valid Amount load (before executing the load) with a valid token	Validate will succeed			
8	Load a Valid Amount then void the same transaction but passing a different Valid Amount to the void	Load should succeed but void should fail			
9	Validate a Valid Amount load (before executing the load) using a voided token (in the voided tokens list)	Validate will fail as the token is in void status			
10	Load a Valid Amount using a voided token (in the voided tokens list)	Load will fail as the token is in void status			

Country	Currency	Minimum Transaction	Maximum Transaction
United States	USD	\$5	\$500
Canada	CAD	C\$15	C\$500
Mexico	MXN	\$100	\$5000
United Kingdom	GBP	£5	£250
Italy	EUR	€15	€500
