# Support for Windows Server 2012 (R2) Is Ending

Microsoft ended primary support for Windows Server 2012 (R2) in 2018, and the final date for extended support is **October 10, 2023**. Updates and security patches will not be provided after that date. Continued use of these solutions beyond their end of support date can place your organization at severe risk for security breaches and interruption of critical business functions. If you are still using Windows Server 2012, it is time to start considering your migration strategy. Sentinel wants to help your organization simplify this challenging and time-consuming migration process with a special AWS Landing Zone for Windows Server.

## What does this Mean?

End of Support = No new feature updates  
End of Extended Support = **No new security updates**

## When does this happen?

Listing Start Date	Mainstream	End Date	Extended End Date
Windows Server 2012 R2	11/25/2013	10/09/2018	<b>10/10/2023</b>

## Overview of Sentinel's Window Server Migration Landing Zone

Sentinel engineers conduct design sessions with your team related to account segmentation, service region, identity federation, connectivity practices, network segmentation, monitoring & logging, DNS & authentication architecture, and other topics to create and implement a production Landing Zone.

Sentinel engineers will migrate up to 50 existing Windows Server 2012 or 2012 R2 Operating System Environments (OSE) to Amazon Web Services (AWS) Elastic Compute Cloud (EC2) instances.

Please contact your account manager for details on how Sentinel can help.
