

CLP Global CPP field	Description
Vessel	Name of vessel
IMO	Vessel IMO unique identifier number
Vessel flag	Flag of vessel
Vessel Class	Class of vessel
Vessel dwt	DWT of Vessel (deadweight tonnage)
Grade	Detailed Grade of product
Grade type	Type of product
Grade subtype	Sub-type of Product
Grade API	Classification of API (Light/Medium/Heavy)
Load date	Date of loading
Load month	Calendar Month vessel loaded
Load year	Calendar Year vessel loaded
Load week	Calendar Week vessel loaded
Load trading week	DOE week vessel loaded cargo
Load trading year	DOE year vessel loaded cargo
Load point	Terminal/berth of loading
Load owner	Parent company of load point
Load port	Port of loading
Load country	Country of loading
Load region	Region of loading
Load area	Area of loading abbreviation
Load area descr	Area of loading long name
Load STS vessel	Vessel that discharges cargo from port to another vessel in lightering zone
Load STS IMO	Vessel IMO that discharges cargo from port to another vessel in lightering zone
Shipper	Shipper indicated on the Bill of Lading
Consignee	Consignee indicated on the Bill of Lading
Offtake date	Date of offload
Offtake month	Calendar Month vessel discharged
Offtake year	Calendar Year vessel discharged
Offtake week	Calendar Week vessel discharged
Offtake trading week	DOE week vessel dishcarged cargo
Offtake trading year	DOE year vessel discharged cargo
Offtake point	Terminal/berth of offload

Offtake owner	Parent company of offload point
Offtake port	Port of offload
Offtake country	Country of offload
Offtake region	Region of offload
Offtake area	Area of offload abbreviation
Offtake area descr	Area of offload long name
Offtake STS vessel	Vessel that loads cargo from vessel in lightering zone and discharges at port
Offtake STS IMO	Vessel IMO that loads cargo from vessel in lightering zone and discharges at port
Route	Route ship took on journey
Progection?	Yes or no field, yes if vessel is still on the water with current cargo, no otherwise
storage?	Yes or no field, yes if vessel is currently marked as floating storage (>7 in storage zone), no otherwise
Probability group	Classification of probabilities (0-25, 26-50, 51-75, 76-100)
declared destination	Destination a vessel on the water has declared if known
Record ID	Internal ID for record
Data source	The primary source of data (US Import Bill, AIS, Inchcape, etc.)
Bill	Bill of Lading number
CD_REPORT	ClipperData Product Category
Fixture date	Date the vessel is set to be fixed for charter
Laycan	Date the vessel is set to load the cargo
Charter load area	Load Area listed on Charterer report
Charter offtake area	Offtake Area listed on Charterer report
Charter grade	Grade listed from Charterer report
Charterer	Company listed as Charterer
Dom/Exp	Domestic or Export movements
Bbls	Bbls_nominal * 'Probability'
Bbls nominal	Total volume on the ship or that segment of a ship
Mt	Mt_nominal * Probability
Mt nominal	Total volume on the ship or that segment of a ship

Probability	Probability of vessel going to particular area and probability of projected grade
Kbd Week LOAD	Total barrels divided by the number of days in the week the vessel loaded
Kbd month LOAD	Total barrels divided by the number of days in the month the vessel loaded
Kbd year LOAD	Total barrels divided by the number of days in the year the vessel loaded
Kbdf week OFFTAKE	Total barrels divided by the number of days in the week the vessel discharged
Kbd month OFFTAKE	Total barrels divided by the number of days in the month the vessel discharged
Kbd year OFFTAKE	Total barrels divided by the number of days in the year the vessel discharged
