

Database Table Specification V6.0 (Eff: June 2019)

Table: greenwich_master

Includes 1:1 data for each job:

Field	Description
job_id	Unique identifier (bigint data type, watermarked for each client)
company	Name of company (as posted) Note: it is not uncommon that a single company is listed as several different names
location	Location of the job (unparsed) Note: This is not necessarily the location of the company headquarters
post_date	The date listing is originally posted
salary	Estimated pay level Note: This is not actual pay level; it is estimated using a proprietary estimating model
salary_modeled	Estimated pay level based on job content modeling (future capability)
vertical	Data segment based on subscription scope (e.g., 'Healthcare', 'Information Technology', 'Retail', 'Public Companies', etc.) Note that positions can be mapped to multiple verticals (e.g., IT jobs in retail companies)
city	Parsed from `location` (where available)
state	Parsed from `location` (where available)
state_long	Full spelling of `state`
zip	Parsed from `location` (where available) or mapped from city
region_state	Metro Statistical Area (MSA) based on US Census definitions
latitude	Mapped from zip
longitude	Mapped from zip
company_ref	Normalized spelling name of company (where known)
sic_primary	Primary SIC code (where known)
naics_primary	Primary NAICS code (where known)
ticker	Ticker code (where exists)
company_parent	Parent company name, for subsidiaries (where known)
scrape_timestamp	The timestamp when the data was originally ingested
modify_timestamp	The timestamp for the last update to the row (This can be used to filter batch updates to include only those rows that have been updated or added since the previous batch update) (may be omitted in samples)

TRADE SECRET. This document contains confidential and proprietary information of Market Advantage Inc. Do not copy or circulate.

This document contains confidential and proprietary information of Market Advantage Inc. and is protected by copyright, trade secret and other State and Federal laws. Its receipt or possession does not convey any rights to reproduce, disclose its contents, or to manufacture, use or sell anything it may describe. Reproduction, disclosure, or use without specific written authorization of Market Advantage Inc. is strictly forbidden.

Table: greenwich_timelog

Includes 1:1 data about the initial post and removal dates for each listing that has been closed.

Field	Description
job_id	Unique identifier
post_date	The date listing is originally posted
status	The status of whether a job listing is open, closed, pending close, or retired
remove_date	The date the listing was removed/closed
duration_days	The number of days the listing was open.
modify_timestamp	The timestamp for the last update to the row (This can be used to filter batch updates to include only those rows that have been updated or added since the previous batch update) (may be omitted in samples)

Table: greenwich_role

Includes 1:Many data for about the roles that a job maps to:

Field	Description
job_id	Unique identifier
role	'role' indicates the scope of job responsibilities. Job titles and responsibilities are mapped into a common role framework to allow consistent analysis across hiring companies.
modify_timestamp	The timestamp for the last update to the row (may be omitted in samples) (This can be used to filter batch updates to include only those rows that have been updated or added since the previous batch update) (may be omitted in samples)

TRADE SECRET. This document contains confidential and proprietary information of Market Advantage Inc. Do not copy or circulate.

This document contains confidential and proprietary information of Market Advantage Inc. and is protected by copyright, trade secret and other State and Federal laws. Its receipt or possession does not convey any rights to reproduce, disclose its contents, or to manufacture, use or sell anything it may describe. Reproduction, disclosure, or use without specific written authorization of Market Advantage Inc. is strictly forbidden.

Table: greenwich_tags

Includes 1:Many data for about various tags associated with each job:

Field	Description
job_id	Unique identifier
tag	Tags are a more flexible mapping of job attributes. Tags are specified by our clients, and can include skills, experiences, programming languages, working conditions, certifications, etc. that are identified in the job listing text.
modify_timestamp	The timestamp for the last update to the row (This can be used to filter batch updates to include only those rows that have been updated or added since the previous batch update) (may be omitted in samples)

Table: greenwich_titles (available for samples when requested)

Includes 1:Many data for about various tags associated with each job:

Field	Description
job_id	Unique identifier
title	Titles are the headline title included in each job listing. Note that it is not uncommon for a job to be listed with multiple titles. Note that unlike the role field, titles are not normalized.
modify_timestamp	The timestamp for the last update to the row (This can be used to filter batch updates to include only those rows that have been updated or added since the previous batch update) (may be omitted in samples)

Note: There are many variations on titles, and they are extremely difficult to normalize. Titles are provided for very granular analyses.

TRADE SECRET. This document contains confidential and proprietary information of Market Advantage Inc. Do not copy or circulate.

This document contains confidential and proprietary information of Market Advantage Inc. and is protected by copyright, trade secret and other State and Federal laws. Its receipt or possession does not convey any rights to reproduce, disclose its contents, or to manufacture, use or sell anything it may describe. Reproduction, disclosure, or use without specific written authorization of Market Advantage Inc. is strictly forbidden.
