

The Labor Market In High Definition

The Greenwich.HR data platform is a powerful extension of traditional financial data and risk metrics

Hiring behaviors signal a company's business outlook and predict changes in labor costs and investments.

We give you a way to see those signals 3-6 months earlier.

A Unique Data Platform:

- Unprecedented scale
- Extensive normalization
- Transaction-level precision
- Key metrics on pay and talent competitiveness
- Entity transparency
- Daily full-image updates
- Ease of access

The Market Advantage:

Accurate

- Data collected from companies, not individuals
- Filtered to remove duplication and enrich data across sources

Tested

- Back-test validated

Trusted

- Used by leading funds to enhance their performance

Data Platform Overview

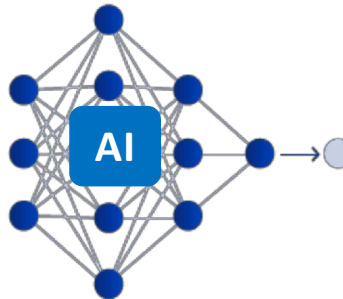

Scale, Transparency, and Normalization

The Most Comprehensive Insights On Future Hiring Behaviors

Looking Forward In High Definition

Greenwich.HR delivers the world's largest real-time labor market intelligence platform. We track the hiring behaviors of over 1.5 million organizations, and capture intelligence on over 70 percent of all new US jobs every day. We track the jobs that companies are hiring right now, so our clients understand where the labor market is going, not just where it's been.
