

TRACK GRAIN GLOBALLY, IN REAL TIME

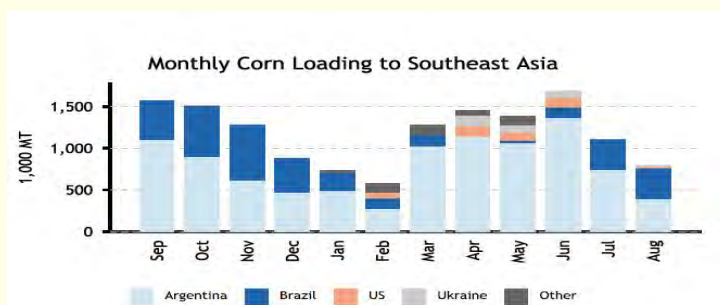

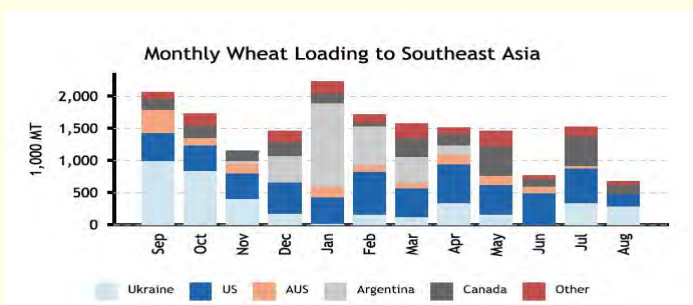

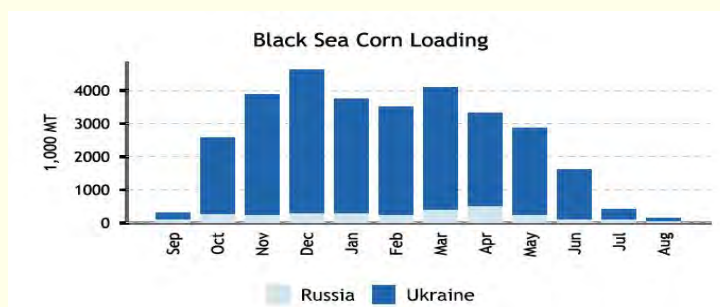

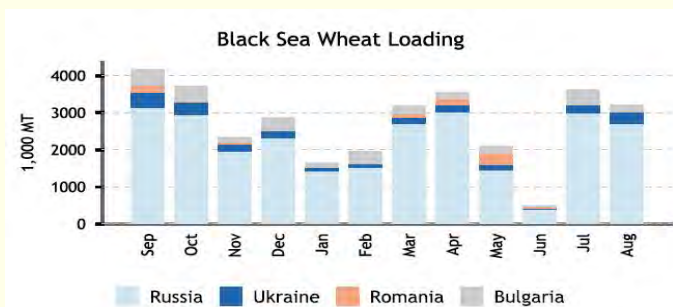

Global Grain and Oilseed Commodity Flow Data

- Identify loading and discharge trends before they hit the news
- Find the gap between actual flow and USDA and other official estimates
- See data-driven estimates of next month's loadings by major origin
- Fundamentally-based forecast of future supply to major consuming areas
- Get a head start with a prediction of next week's USDA inspection totals
- Gain maximum competitive intelligence with a vessel-by-vessel data set

Examples of Loadings

- Data is complemented by analysis from a seasoned agriculture market expert
- Assesses the effect of government subsidies and trade policy
- Get a view on crop and animal herd health, and their influence on supply and demand
- Put weather events in the context of global supply and demand

COVERAGE (TESTED AGAINST OFFICIAL THIRD PARTY SOURCES SINCE 2017)

UNITED STATES
98%

SOUTH AMERICA
95%

BLACK SEA
97%

The data set combines real-time vessel tracking with precise information about cargoes. In addition to commodity flow, the data offers insight into operational efficiency by terminal, port and country.
